

Forest-HNCMB® Ultimate

Technical board composed of HONEYCOMB PP core (density based on physical and mechanical requirements), covered on both sides with high pressure laminate (HPL). One of the sides is covered with anti-slip PVC CLASS III.

Ideal material for busy outdoor areas. All components have core structure of closed cell (they do not absorb water) and PVC sheets formulated with UV filters and reinforced with fiberglass mesh.

Gluing

Class III (EN 314-2)

Variations

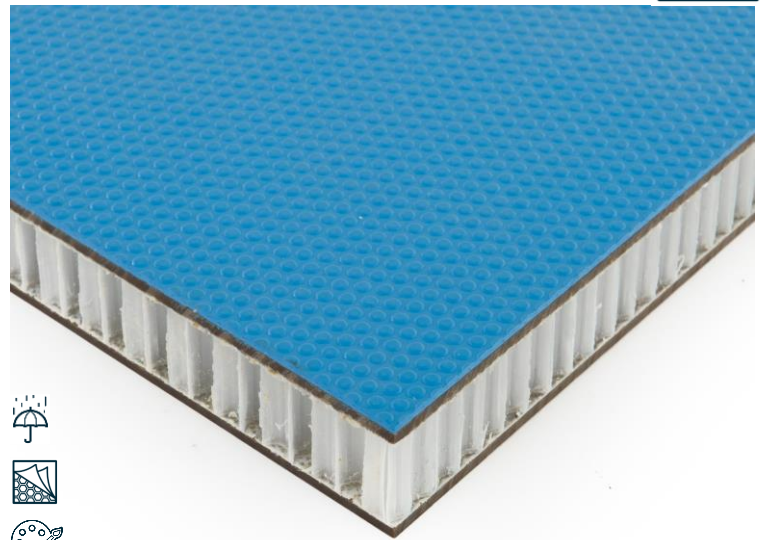

Fireproof

Cores

- HNCMB PP
- HNCMB Aluminium
- HNCMB Nomex

Main uses

Manufacture of construction modular systems
Exterior security floors

Thickness (mm)

From 18 until 125

Dimensions (mm)

From 2440 *1220 until 3650*1500
